

CHEXPRESS. CX30

The CheXpress® CX30 is the first **low cost** bank quality scanner designed for Remote Deposit Capture that does not compromise on features and function. An easy to use design, high quality images, accurate MICR and a small footprint make the CX30 an ideal small business scanner.

Key Features and Benefits

FEATURE	BENEFIT
Non contact image cameras	Clearer images, significantly less cleaning
Fast and quiet	Saves time and works well in any office
Dual MICR capture	Adjust the magnetic read on the 2nd pass for weak MICR signal (laser printed checks), higher accuracy of MICR capture
Scan & Return mode	Ergonomically easier to use
Enclosed paper path	Keeps dirt and debris out of the scanner, helps minimize noise when scanning
Advanced front and rear image capture	Allows for capture of up to 4 images per document, images can be any combination of color, grayscale or bitonal and multiple resolutions of up to 300 dpi
Smaller footprint	Fits easily into a typical office environment
Recessed and tri-directional cable routing	Saves desk space and allows it to be placed against walls
Intuitive design, markings and lights	Easy to learn and use
Rear bi-directional inkjet printer	Endorse on the way in or on the way out
Front franking stamp	Optional fraud deterrent measure, also includes a user replaceable stamp
Dual 300 dpi cameras	Higher image quality, even at 200 dpi
Anti-static plastic	Dust and debris won't cling, virtually no cleaning required
Fewer parts, snap together design	Better reliability and lower cost
Uses 50% less power than other models	Green friendly
Built in the USA	Local supply and support
Uses Digital Check's common API	Capture difficult documents (money orders, Canadian checks) without manual adjustments, automatic image rotation and much more
