NEWS RELEASE

For Immediate Release

BankServ partners with Digital Check to offer CheXpress[®] with its DepositNow[®] for Small Business

San Francisco, September 3, 2009 - BankServ, worldwide experts in electronic payments, today announced that it has partnered with Digital Check, a leading provider of desktop check scanners for the remote deposit capture and financial industry, to drive the penetration of desktop check scanners into the small business marketplace. BankServ has certified Digital Check's CheXpress CX30 scanner for use with its DepositNow[®] application, giving small businesses a powerful, affordable, bank-anywhere receivables management solution.

BankServ's DepositNow allows a user to quickly and securely deposit paper checks into their existing checking account with a computer and check scanner. DepositNow deposits the payment to any checking account in the United States (as designated by the business owner) and automatically updates accounts receivable for businesses using QuickBooks[®] or Peachtree[®].

"Many small businesses can save tremendous time and money by depositing check payments directly from their office to their bank account," said David Keenan, VP Sales and Marketing at BankServ.

"However, the upfront cost of purchasing a check scanner can be a big hurdle for businesses unfamiliar with the technology. We are excited to partner with Digital Check to remove this hurdle and get businesses across the United States up and running on this powerful technology."

Digital Check's CheXpress CX30 scanner fits virtually all small office and home office needs due to its low cost, quick and quiet operation, small footprint and extensive features including dual image capture, dual MICR read technology, and both audit trail endorsement and franking capabilities. The scanner

combines bank quality image and MICR capture capabilities at a lower price point to meet the needs of smaller business customers. The energy efficient check scanner also supports green initiatives with low power consumption and remote shutdown capabilities.

“In addition to the time and cost benefits to small businesses, they are increasingly adopting remote deposit for increased risk management control and of course, improved cash flow management – issues that appeal to businesses of any size,” said John Gainer, Digital Check Executive Vice President.

“BankServ offering a low priced, high quality scanner such as CheXpress CX30, in conjunction with their bank-anywhere DepositNow solution, is a very compelling concept, and should help open the door to many small businesses to begin using remote deposit because of the affordability and reliability of BankServ’s bundled solution.”

Details regarding DepositNow and the CX30 scanner can be found at www.depositnow.com.

About DepositNow!®

DepositNow!, the leading payment management solution for Small Business, is available through financial institutions across the United States and available directly at www.depositnow.com. In addition to enabling safe, secure online deposits of paper check payments, DepositNow! now enables online payments by payment card or electronic check directly from invoices. DepositNow! remains the only product to automate the accounting related to online deposits for QuickBooks™ and Peachtree™ accounting system users.
