Synovus Renews Commitment to Digital Check Scanners

--Reaches milestone of 2,000 units deployed in remote deposit capture--

LAS VEGAS, Nov. 13, 2007 – Digital Check Corp, a leading provider of electronic check scanners for the distributed check capture industry, announced that Synovus Financial Corp (NYSE: SNV), a Columbus, Georgia-based financial services company, has renewed its commitment to deploy Digital Check check scanners to customers as a part of their remote deposit capture service. Synovus exclusively distributes Digital Check's TellerScan[®] devices through the bank's corporate treasury group. The companies have partnered since 2005 and recently reached the milestone of 2,000 units deployed.

Synovus provides corporate remote deposit capture services to customers through 37 banks and other Synovus offices in Georgia, Alabama, South Carolina, Florida and Tennessee. Synovus' remote deposit capture service consists of software from Metavante Corporation, a leading provider of banking and payments technology, and Digital Check TellerScan electronic check scanners, with fulfillment capabilities from Benchmark Technology Group. Digital Check's agreement with Synovus includes a scalability program that enables Synovus customers to upgrade to newer or larger capacity models of Digital Check's TellerScan check scanners through a trade-in allowance.

"We are excited about our expanded relationship with Synovus and believe it will provide even greater benefit to Synovus' customers," said John Gainer, executive vice president of Digital Check. "We continue to work with our partners to develop and implement enhancements to the way the scanner and remote deposit capture applications interact that benefit the customer. Through the scalability program, Synovus customers have a cost-effective way to upgrade their devices based on their needs."

"Our commitment to Digital Check is based on their ability to deliver the highest quality and most reliable check scanners in the industry," said Kenneth L. Richey, enterprise deposit

officer and director of corporate cash management at Synovus. “At Synovus, our selection of service providers must align with our objective of providing the highest quality services to our customers.”

About Digital Check

Digital Check Corp. is a leading manufacturer of distributed capture check scanners for teller and branch automation and remote deposit capture applications. Digital Check’s TellerScan® series of electronic scanners provide the highest quality images, MICR accuracy, reliability and lowest cost of ownership within the industry. It was the first company to introduce a desktop distributed capture device for the Check 21 industry, first to deploy at a teller window in a top 10 U.S. bank and the only U.S.-based manufacturer. The company’s scanners are available worldwide through a network of more than 70 Authorized Solutions Providers and are supported by Digital Check’s comprehensive fulfillment, training, support, warranty and repair services. For more information call 847-446-2285 or visit the company’s website at www.digitalcheck.com.

About Synovus

Synovus (NYSE: “SNV”) is a financial services holding company with \$34 billion in assets based in Columbus, Georgia. Synovus provides commercial and retail banking, as well as investment services, to customers through 37 banks, 440 ATMs, and other Synovus offices in Georgia, Alabama, South Carolina, Florida and Tennessee; and electronic payment processing through an 81-percent stake in TSYS (NYSE: “TSS”), one of the world’s largest companies for outsourced payment services. The company focuses on its unique decentralized customer delivery model, position in high-growth Southeast markets and commitment to being a great place to work to ensure the delivery of unparalleled customer experiences. Synovus has been named one of “The 100 Best Companies to Work For” in America by *FORTUNE* magazine, and has been recognized in its Hall of Fame for consecutive appearances on the list since its inception in 1998. See Synovus on the Web at www.synovus.com.
