Digital Check Scanners Compatible with Windows 7 Operating System

- Users switching to new system will experience no service interruptions -

NORTHFIELD, Ill., Oct. 26, 2009 – [Digital Check](#), a provider of desktop check scanners and remote deposit capture technology to the financial industry, announced that its line of USB-based check scanners is compatible with the new Windows 7 operating system released Oct. 22.

Digital Check's recent v10.0 release of its API software toolkit enables all of its check scanners to integrate seamlessly with Windows 7, ensuring that users switching to the new operating system experience no service interruptions. Digital Check utilizes a single API across all of its desktop scanning devices to provide ease of maintenance for its software application partners.

"There has been considerable promotion surrounding the new Windows 7 operating system launch, and we expect it to gain adoption among our customer base," said John Gainer, executive vice president for Digital Check. "It is important that our customers, both financial institutions and consumers, be able to make software decisions without concern that their peripheral devices will be affected, and our timely approach to the Windows 7 launch ensures our clients experience no hiccups."
