 - Auto Get IP: (radio button unselected)
- Driver Selecting:** Driver Name: SRN 2PTR(U) 1 (dropdown menu)
- Test Connection:** Test Connection
- Buttons:** OK (with green checkmark icon) and Cancel (with red X icon)

Instructions for updating the SRN firmware

4. Click on 'FW Download'

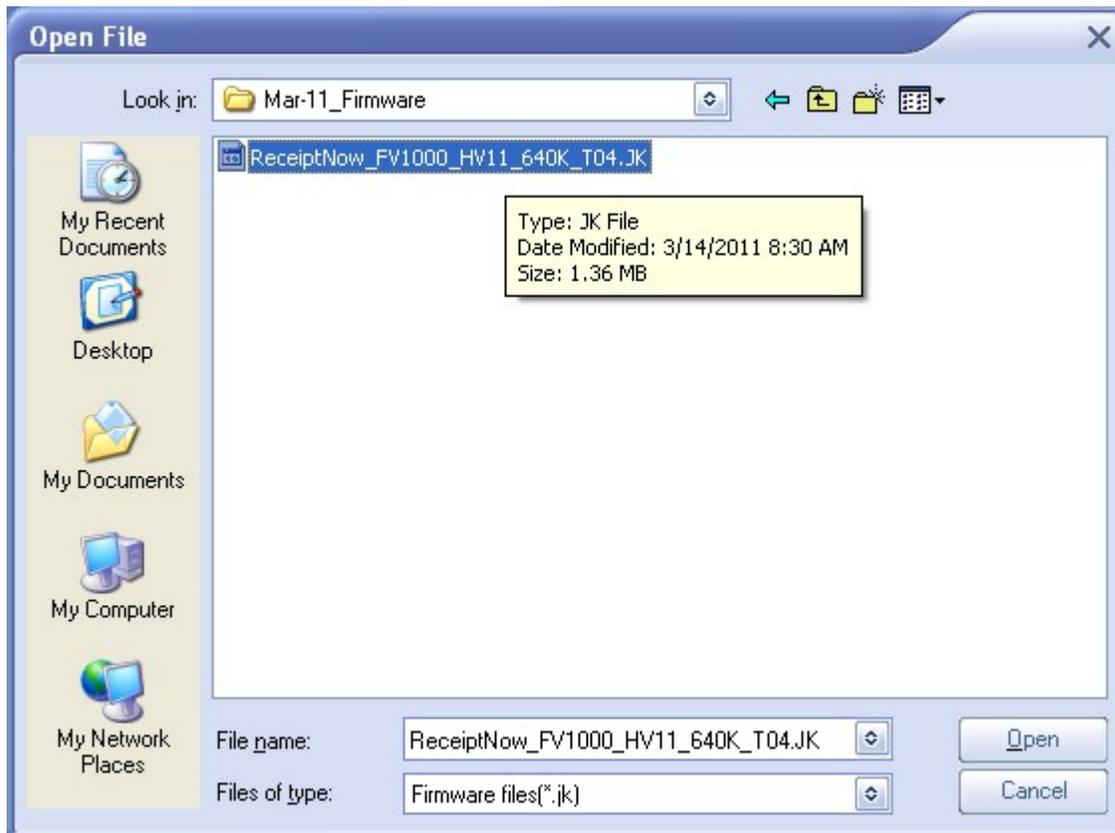

5. Select the '*.JK' radio button, then click on 'Open'

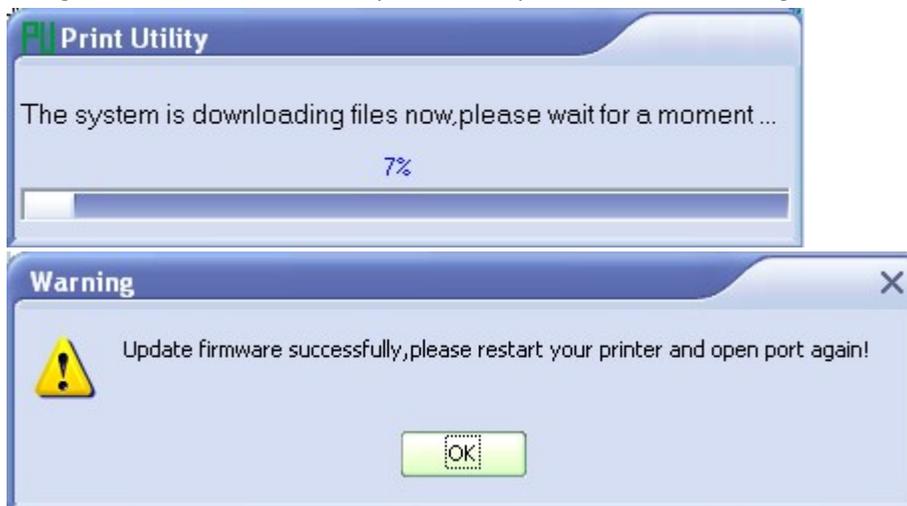

Instructions for updating the SRN firmware

- To install the firmware, navigate to the C:\Temp\ folder and select the firmware file *.JK

- Click 'Open', then click 'Download'. A progress meter will be displayed while the firmware is being downloaded. When completed, an update successful dialog box should be displayed.

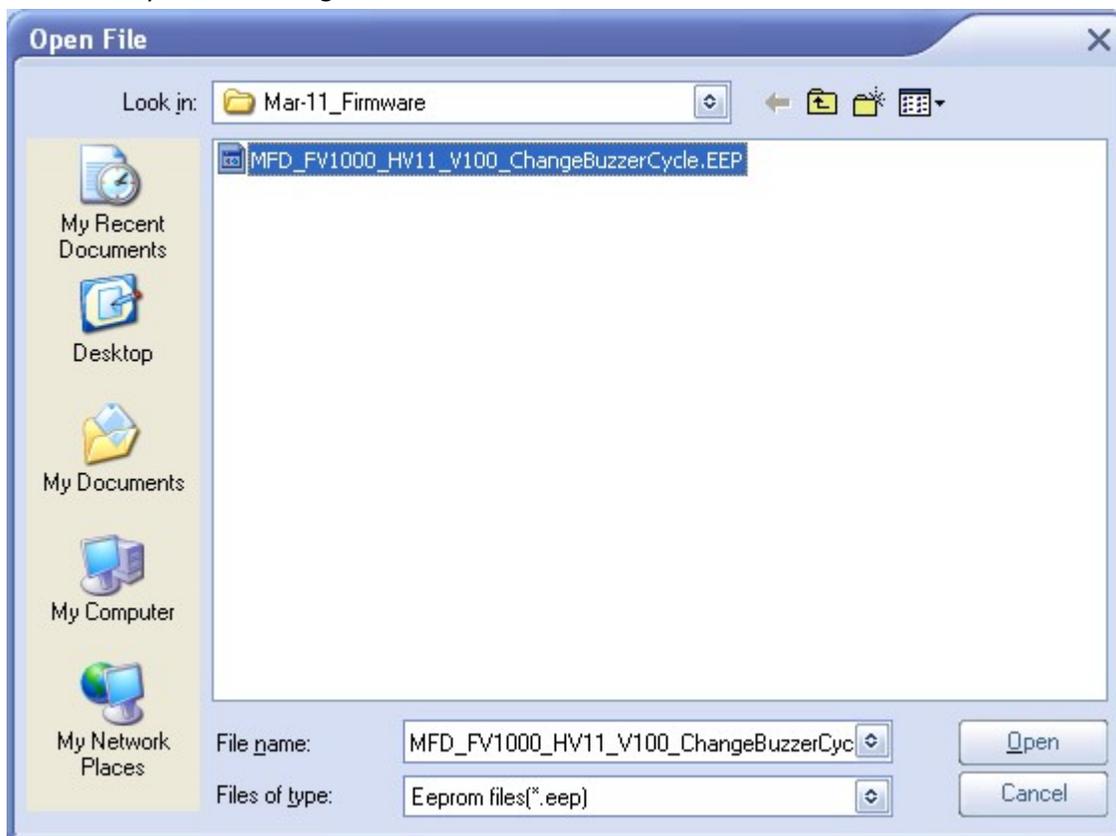

- Close the dialog box, cycle power on the printer. Repeat steps 3 thru 5 to re-establish communications with the printer and prepare for downloading a second firmware file then continue on to step #9.

Instructions for updating the SRN firmware

9. Select the '*.EEP' radio button and then click 'Open'

10. Navigate either to the folder C:\Temp\ and select the file *.EEP. This is the same file regardless of whether you're installing 'new' or 'old' firmware.

11. Click on 'Open' and then 'Download'. The same dialog box should be displayed as mentioned in step #7. Upon successful completion, cycle power on the printer. The firmware has now been updated. Proceed with updating the driver
